It's alright, but needs some work to be good.

Worth the \$0.99.. All up, not a bad game, really short but its a good to waste time, theres no replay value and i recomend configuring your own controls because the standed controls that the game has set for you and just annoying to use, if this game is on sale for like under \$1 then i recomend it, not a bad quick game to play from start to finish. My love for whole life. I finished this game abou 200x and I will do it again everytime I need some good nostalgic relax. MDK was best game of year 1997 and still is one of the best action games in the world.. Have a Tattoo of this game, need I say more ?. really struggled to 100 percent but did it anyway :)

. This is the best game of cerdocornios in all the universe, the cerdocornio is so hot and sexy, when I was playing I had an $\u2665$ <3. So here's another one of those, I never write review reviews.. But SERIOUSLY.

As someone who has been DJing for years now, I never ever thought that I would someday see myself being able to literally load up MY OWN music onto a pair of virtual CDJs and put on a show for other people via live-stream / recording. The system is AMAZING! I expected terrible latency, I expected less than average controls, and I was SO WRONG. You can load your own tracks, split audio between two sources (Which is great for recording/streaming if you don't want others to hear your cueing) and THE CUEING system is so great. These things literally function like any club standard CDJs that I've ever played on right down to the effects, quantize features, and the hot cues. It's AWESOME.

For anyone who is looking to utilize this as a beginners tool to learn or as a veteran looking for something completely different and just totally cool, don't sleep on this program. I promise you, it's worth 20 dollars, maybe more.

This program is absolutely AMAZING. Please Devs, please don't give up on this project! I would love to see virtual shows, custom avatars, and even custom party rooms! I can't wait to see where this goes. Thank you so much for reviving my will to mix again after losing my decks.

Space Giraffe has been on my radar for ages. Tempest 2000 is among my favourite games of all time and I was thrilled to discover this one existed, which is not to say my expectations for Space Giraffe were sky high -- Jeff Minter makes thoroughly interesting and idiosyncratic games and I knew I was going to like this one, but the reading up I'd done on Space Giraffe had me a little cautious. Optimistic, but cautious.

I've only just begun to get into the game, but the tube shooty gameplay definitely delivers the smooth meltiness I was hoping for. UI and configuration is kinda lo-fi but performance is superb. Further thoughts to come as more time goes in! Really looking forward to getting to know this thing :)

If you're on the fence but you've played and enjoyed something Llamasoft in the past, you should probably play this.. This game feels like it was designed by a 12 year old. The hit detection is terrible, the graphics/animations are mediocre, it's totally imbalanced and just overall not fun.

Basically, this game is on par with free-to-play microtransaction moneygrab games, except it has a \$15 up front price tag.. Not a puzzler like Desktop Dungeon, although it feels like it, this game is an RPG that looks like it is from 1993. It is very addictive and the poker hands to cast spells is very unique and an awesome game mechanic. Huge replayability and quests.

Only drawbacks are the sometimes the game crashes or starts with a black screen and you lose everything. Sometimes the dev could help. Othertimes you are SOL.

Anyway, this is a suprisingly deep poker-based RPG. It's also funny but not obnoxious. Love the concept, exploring, and battles.

I actually beat it and was hoping for more replayability after it, but no such luck.. I have to recommend this one, because otherwise you might never hear about it. If you like both adventure games and puzzle games with ♥♥♥♥♥♥♥♥/amazing writing, this may be the game for you. The ending is pretty rough, but all the way until then I really enjoyed this game.. Perfection.. It was fun, but somewhat boring -for me at least- (maybe too much Zup! games are existing?), but still enjoyable. Also, I find the name idiotic. Zero 2? Come on! I can recommend this game, though. Worth the price.. It's like R-Type, but not quite as good. Still, I enjoy it.. absolutely \u2665\u2665\u2665\u2665\u2665 game - bad controls, bad mechanics, very boring - don't be fooled by the nice screenshots - graphics is not so interesting in the game...
