HumbleBundle-5-9-2017-60-Day-Promo-Keys.bin.rarQ: How to make that a JSQMessagesViewController and a table view are showing inside each other? Let's say I have a table view, like in "Programming iOS 7" app from Apple. And I want that a JSQMessagesViewController is showing inside that table view. I have code for table view in my tableviewController file: - (NSInteger)numberOfSectionsInTableView:(UITableView *)tableView { return 1; } - (NSInteger)tableView:(UITableView *)tableView numberOfRowsInSectionInSection:(NSInteger)section { return 5; } - (UITableViewCell *)tableView:(UITableView *)tableView cellForRowAtIndexPath:(NSIndexPath *)indexPath { static NSString *CellIdentifier = @"Cell"; UITableViewCell *cell = [tableView dequeueReusableCellWithIdentifier:CellIdentifier]; if (cell == nil) { cell = [[UITableViewCell alloc] initWithStyle:UITableViewCellStyleDefault reuseIdentifier:CellIdentifier]; } if (indexPath.section == 0) { // Configure the cell... if (indexPath.row == 0) { cell.textLabel.text = @"Your Message Here"; cell.detailTextLabel.text = @""; } else { //... and remove the comment below if you do not want to use the default font //cell.textLabel.font = [UIFont fontWithName:@"Courier New" size:18.0]; NSString *myMessage = [NSString stringWithFormat:@"This is a message 82157476af"]; } } return cell; }
